

YOUR LED LIGHTING & EV CHARGING PARTNER

Who We Are

LightSource is the premier provider of energy-efficient **lighting upgrades** and **electric vehicle (EV) charging installations**.

- Your one-stop shop for clients in search of the best, most objective solutions.
- More than 24 years of experience in a wide range of industries -- healthcare, manufacturing, education and commercial buildings.
- Upgrades that are painless and efficient.

What We Do

Our turn-key services help you to "go green" with changes that make a difference to your company's bottom line now. This happens through utility cost reductions, elevated productivity and enhanced facility values. And, when you upgrade or install with us, you are also improving the quality of life for your employees.

In short, we can help you achieve your goals:

Sustainability

Drive Down
Operational
Costs

Workplace Safety

Improved
Productivity

Two Offerings, One Turn-key Process

Whether you're ready to upgrade your current lighting, install your first EV charging stations, or both, we provide our customers complete service, **from audit to installation:**

- Pre-qualify projects
- Conduct audits
- Select the best equipment and manufacturer for your needs
- Prepare proposals, including ROI and payback analysis
- Investigate and secure all local, state and federal incentives available (including EPart 179D - accelerated tax deduction for building energy efficiency)
- Provide quality installation by certified installers
- Remove and recycle old equipment
