

VIRTUAL SAFETY PROJECTORS

WHO WE ARE

LightSource is the premier provider of

- energy-efficient lighting upgrades,
- virtual safety projectors, and
- electric vehicle (EV) charging installations.

We are your one-stop shop for the best, most objective solutions. We have 25 years of experience with more than 3,500 projects in a wide range of industries: healthcare, manufacturing, warehousing, education and commercial buildings.

WHAT WE DO

Our turn-key services help you to "go green" with changes that make a difference to your company's bottom line now. This happens through utility cost reductions, elevated productivity and enhanced facility values. And, when you upgrade or install with us, you are also improving the quality of life for your employees.

VIRTUAL SAFETY PROJECTORS

This solution directs behavior, improves safety, and reinforces standards with smart floors in your facilities in these ways:

- Reduces pedestrian and forklift accidents with vibrant messaging that will not wear off;
- Eliminates the need to replace, repaint or retape, reducing maintenance costs;
- 75,000-hour rated life (13-year life at 24 hours/5 days per week);
- Incorporates symbols to reinforce safety standards; and
- Creates walkways across busy traffic areas, eliminating jaywalking and keeping pedestrians safe.

In short, we can help you achieve your goals:

Sustainability

**Drive Down
Operational Costs**

Workplace Safety

**Improved
Productivity**
